
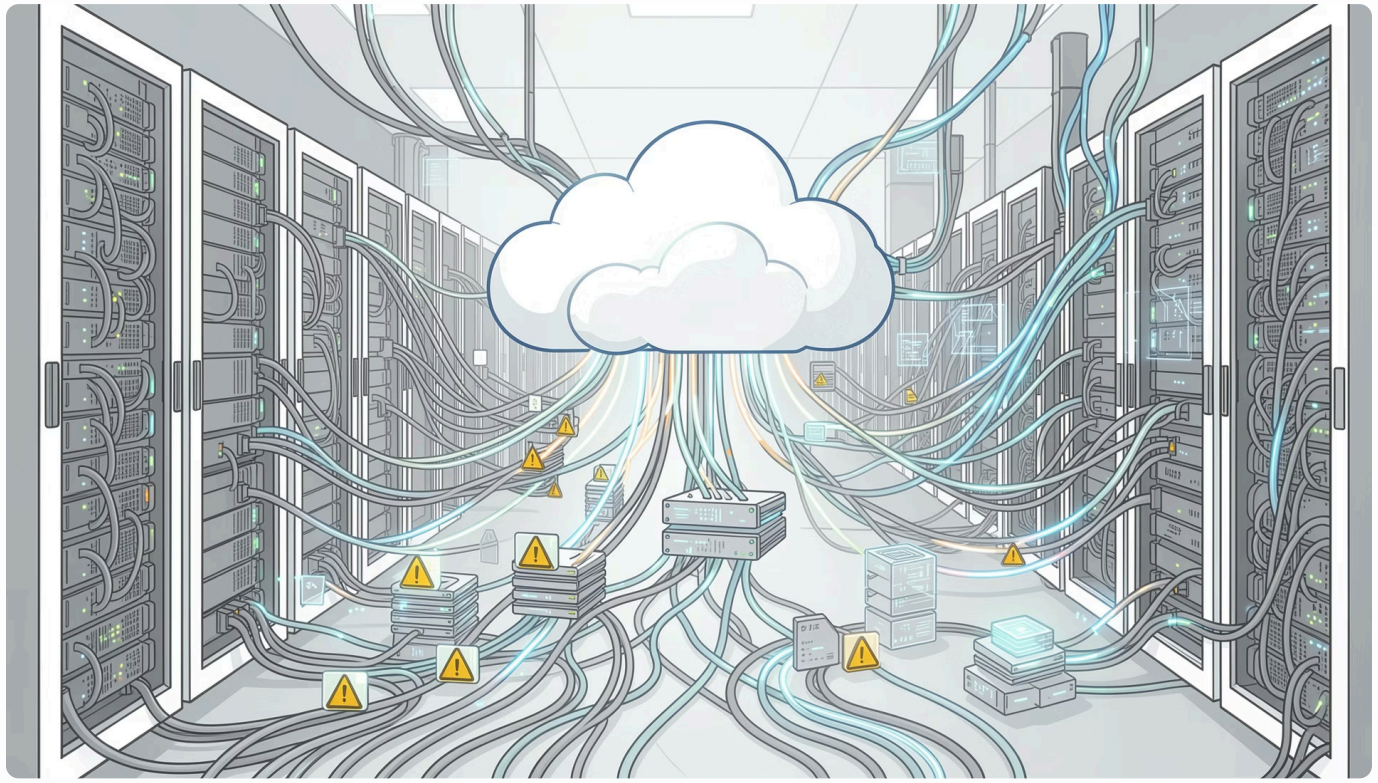
Revolution Network

Decentralized Compute Infrastructure for the Next Generation of Web3 — powered by the **ATH token** and a global network of distributed nodes.

DEPIN COMPUTE WEB3

Made with GAMMA

The Problem We Solve



Centralized Compute is Broken

Cloud giants like AWS and GCP are expensive, opaque, and controlled by a handful of corporations. Developers building data pipelines, AI workloads, or automation tools face unpredictable pricing, vendor lock-in, and single points of failure.

💸 High Cost

Pay-as-you-scale becomes pay-as-you-suffer at volume.

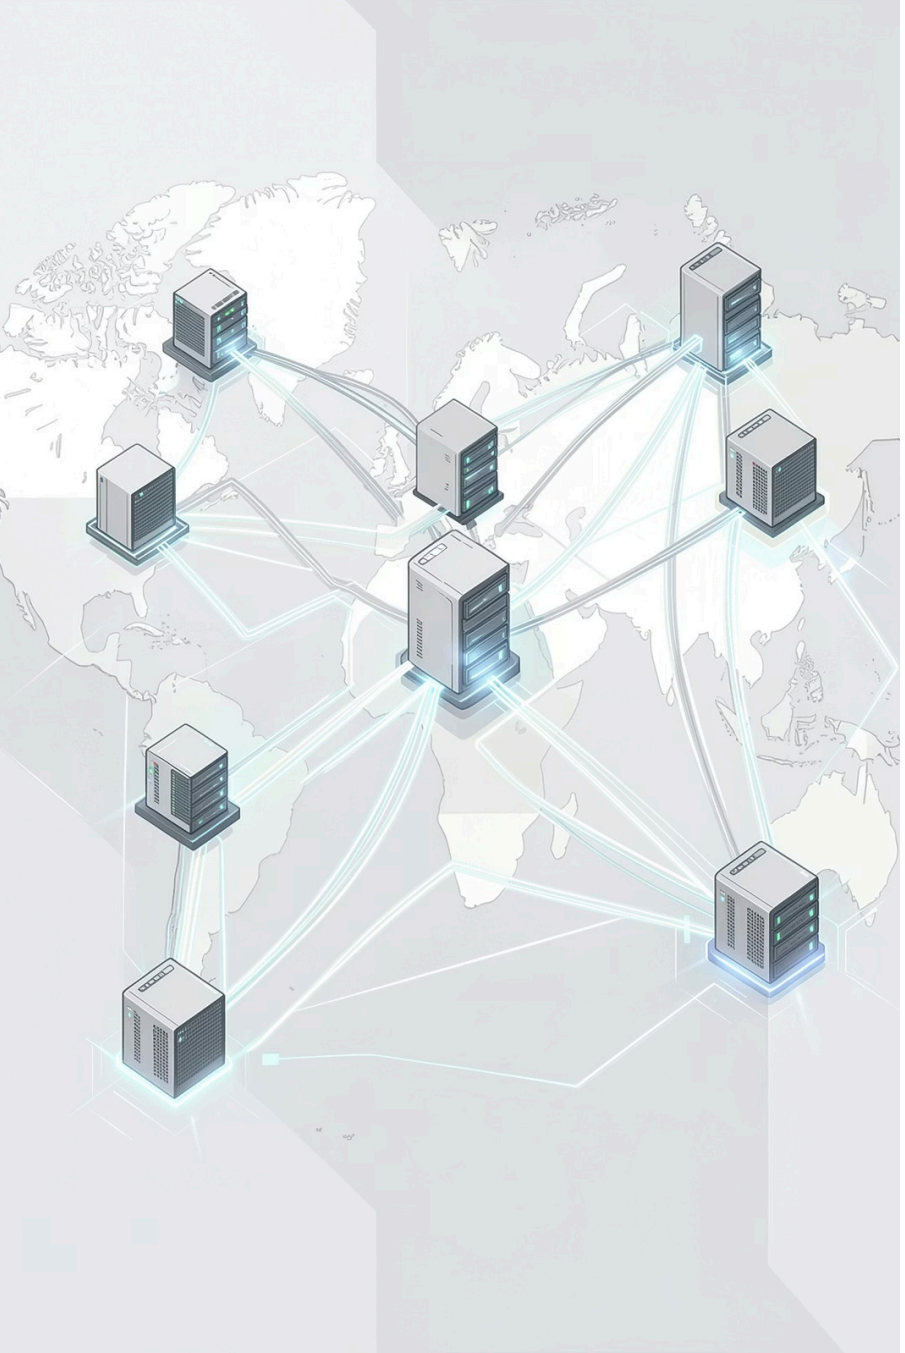
🔒 Lock-in

Proprietary APIs trap teams in expensive ecosystems.

⚠️ Single Points

Centralized failures cascade across global services.

Made with GAMMA



Introducing Revolution Network

A decentralized compute infrastructure (DePIN) where anyone can contribute computing power and any developer can consume it — through a single, unified API.

🌐 Distributed Nodes

Global contributors power the network in exchange for ATH rewards.

⚡ Unified API

One endpoint for scraping, OCR, video, audio, code execution & more.

🔗 Web3 Native

Token-incentivized, governance-enabled, fully decentralized infrastructure.

Made with GAMMA

Core Architecture

Every compute job flows through a resilient pipeline: authenticated requests enter the API Gateway, are queued and dispatched to available nodes, results are aggregated and validated, then returned via the same unified interface — with outputs stored on a decentralized R2/S3-compatible layer.

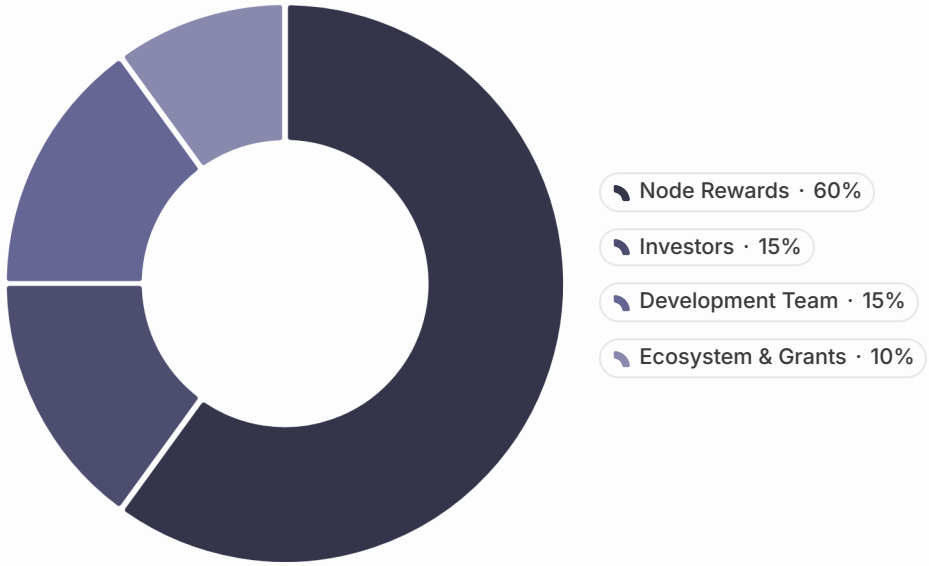
Made with GAMMA

Tokenomics — ATH

TOKEN NAME: AETHER

SYMBOL: ATH

TOTAL SUPPLY: 500,000,000



Distribution Breakdown

ATH is designed to align every stakeholder — compute providers earn the majority, ensuring deep liquidity on the supply side from day one.

60% Nodes

Compute provider rewards

15% Investors

Seed / Private / Public

15% Team

Vested development fund

10% Ecosystem

Grants, liquidity, partners

Made with GAMMA

ATH Token Utility & Economics

Token Flow

Six Pillars of Utility

API Payments

Pay per compute job in ATH

Node Rewards

Earn ATH for processing jobs

Governance

Vote on protocol upgrades

Staking

Stake to boost node priority

Burn Mechanism

% of API fees permanently burned

Marketplace

Trade compute resources peer-to-peer

Made with GAMMA

API System & Developer Integration

Core Endpoints

POST /jobs

Submit a compute task with job type and payload

GET /jobs/{id}

Fetch result, status, and metadata

POST /nodes/register

Onboard a new worker node to the network

GET /stats

Real-time network analytics and health

Supported Job Types

scrape

Web scraping at scale

ocr

PDF & image extraction

video_encode

FFmpeg processing

audio_convert

Format transcoding

data_process

Pipeline & CSV analytics

code_execution

Sandboxed code runner

Made with GAMMA

Market Opportunity

A Convergence of Massive Tailwinds

Revolution Network sits at the intersection of three explosive market trends — decentralized infrastructure, AI compute demand, and the data economy.

$791B

Cloud Market

Global cloud infra by 2028

$1.8T

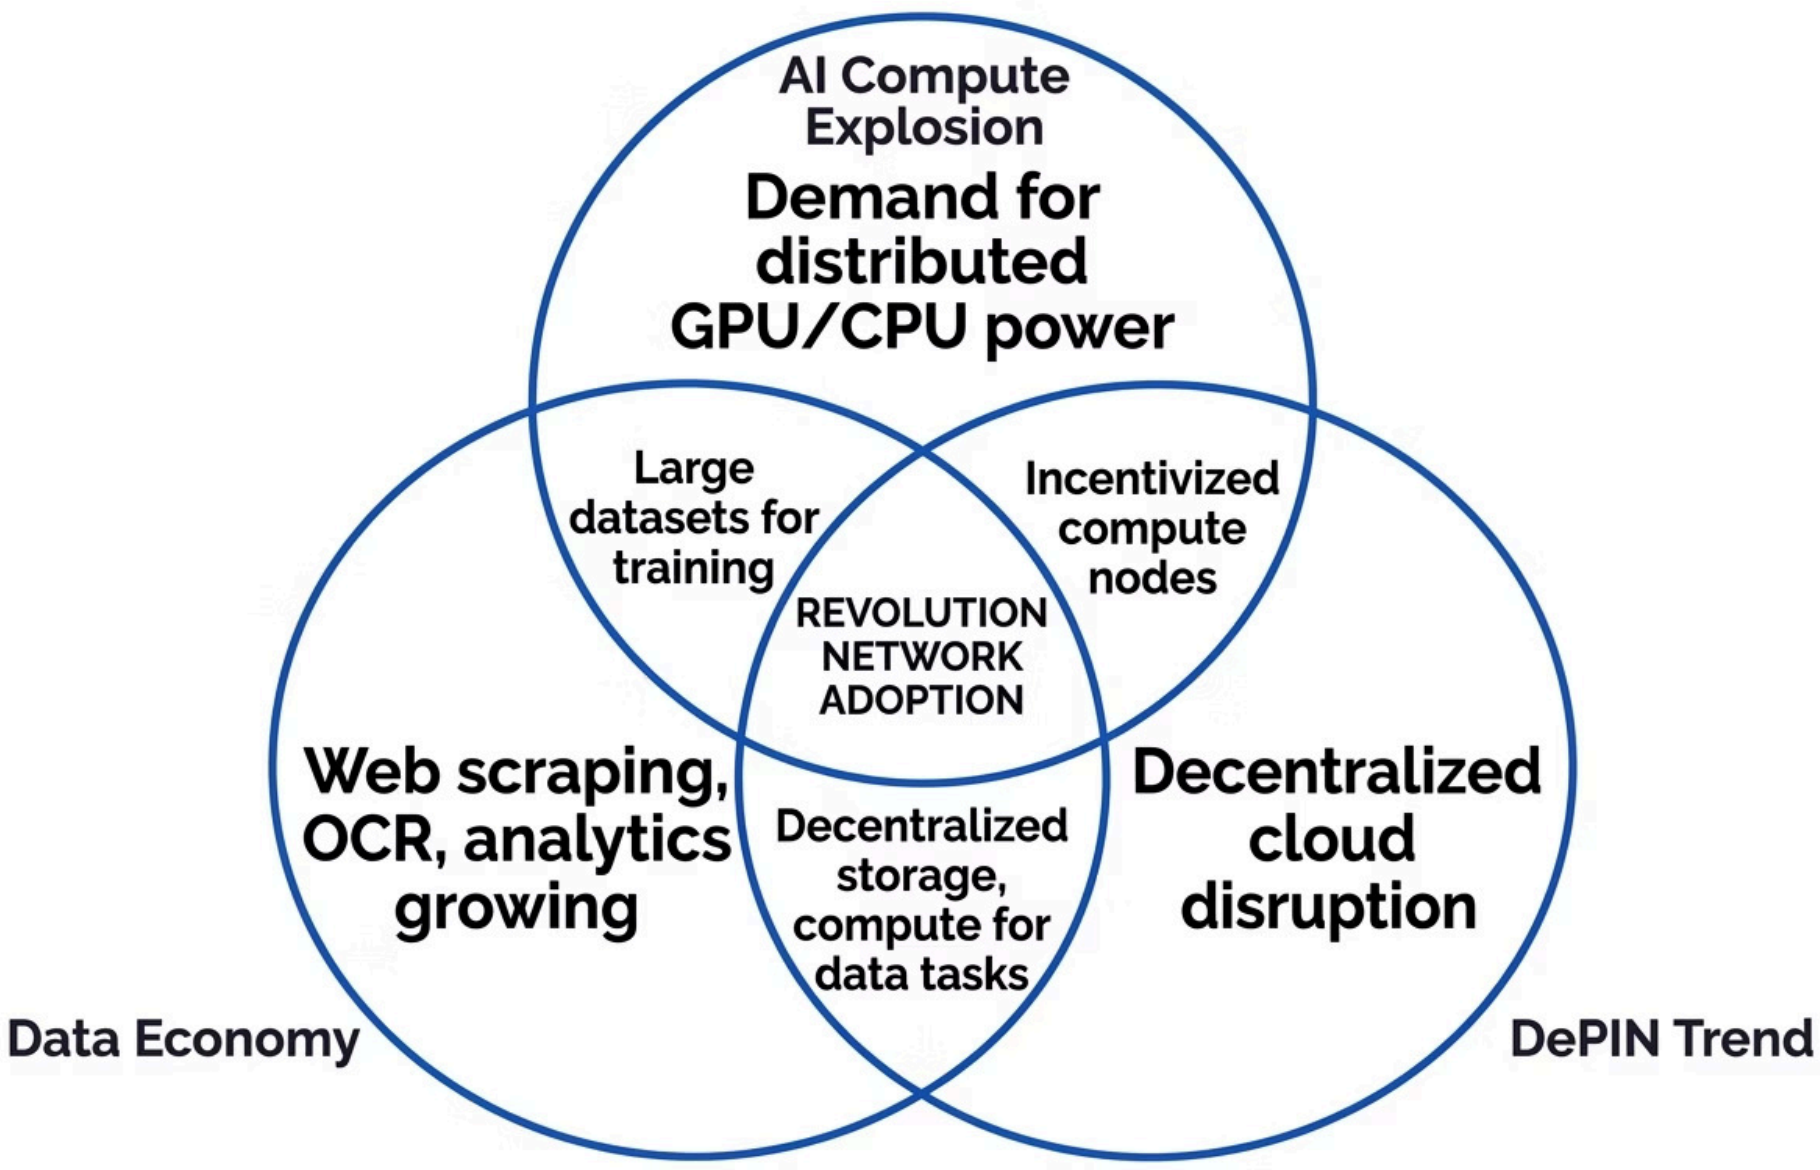
AI Compute

Projected AI workload spend

42%

DePIN Growth

YoY sector expansion in Web3



Made with GAMMA

Security & Node Incentive Model

Security by Design

🛡️ Sandboxed Execution

Every job runs in an isolated container — no cross-contamination.

✅ Job Validation

Multi-node result verification before delivery.

⚡ Rate Limiting

Anti-abuse controls at the API Gateway layer.

⚔️ Slashing

Malicious or failed nodes lose staked ATH.

Node Incentive Design

Performance Rewards

High-throughput nodes earn a multiplier bonus on ATH rewards.

Reputation Score

Consistent uptime and accuracy drive preferential job allocation.

Uptime Bonus

Nodes with 99%+ uptime receive weekly bonus ATH distributions.

Made with GAMMA

Roadmap & Next Steps

1 — Phase 1 — Foundation

API launch, node beta, basic compute jobs (scrape, OCR, video)

2 — Phase 2 — Token Launch

ATH TGE, RapidAPI listing, Marketplace activation, staking live

3 — Phase 3 — Enterprise

Enterprise subscriptions, DePIN scaling, Governance system deployment

4 — Phase 4 — Decentralization

Full protocol decentralization, global compute marketplace, DAO governance

Revolution Network is actively onboarding early node operators, API partners, and seed investors. Join the network at the ground floor.
